

The Splash

2015 is off to a busy start. We have many new projects under way and we are looking forward to their grand openings this summer. The City of Lee's Summit, MO will be opening their first Splashpad with a huge Super Splash as their central feature (Read more about this on page 2). The City of The Village, OK is also currently building their first Splashpad in the shape of a heart thanks to a generous donation from Love's Travel Stops (More on page 2). Vortex Aquatic Structures held their Global Sales Meeting in February and continues to be the leader in the Aquatics play industry. They introduced several new innovative and exciting products. We are excited to share that Vortex recently established a partnership with National Purchasing Partners. This cost savings program will allow our customers to save time and money during the purchasing process.
